

Artificial Intelligence Elements Region XV

April 11, 2025 ♦ 1PM—5PM
ONLINE

Course Outline:

Artificial Intelligence is here! This course is designed to understand what AI is and how this will impact Law Enforcement and criminal activities. This REVOLUTIONARY advancement in technology requires law enforcement officers and investigators to explore the elements of AI to understand the basis of the technology. This will surely be a life changing technology as criminals integrate AI into their arsenal. The Internet already exists without borders; therefore, we must increase our knowledge base and skill sets as an ongoing process. The most effective method to meet Artificial Intelligence is by first understanding what AI is and what this technology means for all of us.

Course Objectives:

This webinar will expand the knowledge of investigators to understand the position and place of Artificial Intelligence in the wake of evolution. In this class students will prepare for the changing dynamics of technology by adapting to AI in the Cyber Forensics landscape. This course will prepare learners to expand their scope of potential threats with regards to how AI will be used to facilitate criminal activities.

Who Should Attend:

- ♦ Law Enforcement Officers, Investigators, legal council
